

## K-BRT™ BORE INSTALLATION/ RETRIEVAL TRAILER

K-BRT™ IS A SAFE, MOBILE AND EASY TO OPERATE SYSTEM TO INSTALL, TEST AND RETRIEVE BORE DEWATERING PUMPS FROM IN-PIT APPLICATIONS

**We are specialists in delivering and supporting mobile dewatering pumps and equipment to aid the removal and disposal of water to maintain site safety and productivity. We utilise our expertise, engineering and manufacturing capabilities to deliver high quality, reliable solutions to meet all your dewatering needs. Our dedicated field and in house teams are on standby with full service and support.**

KETO offer a broad range of reliable custom build dewatering solutions for emergency situations, temporary rental and permanent installations. We fabricate a large number of unique product offerings in-house including the K-BRT™ Bore Installation/Retrieval Trailer, K-HWT™ Bore Headworks Trailer and Dewatering Pump Sets. We also provide a unique hire facility in order to deliver to our customers access to cost effective, short-term and long-term pumping solutions.

The K-BRT™ design allows for cost-effective, safe and efficient use of resources to minimise operational downtimes.

Designed in conjunction with leading mine operators to reduce the risk associated with bore pump installation, testing and retrieval. It's versatility enables a rapid turnaround of bore pump equipment. The K-BRT™ meets or exceeds mine site operational compliance requirements and safety specifications.

Key features include dual winches capable of multi-speed and independent operation to deliver safe and effortless installation and retrieval. Cassette reel design allows for back to back operation and easy storage. It removes 100% of working under live load.

## FEATURES AND BENEFITS

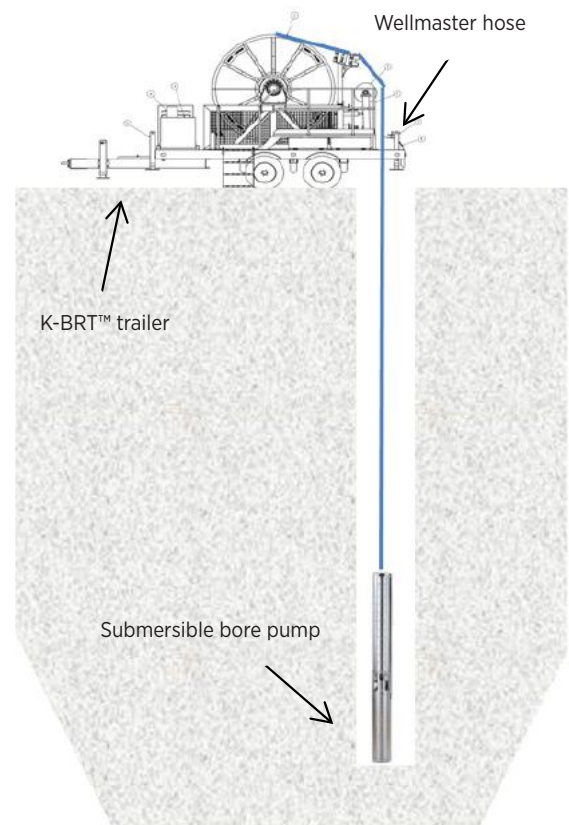

- Dual winches are capable of multi-speed and independent operation to deliver safe and effortless installation and retrieval
- Modular / cassette reel design for continuous back-to-back operation, reloading, maintenance work and storage
- The modules or cassettes can be used in our purpose-built work frames for yard based maintenance or pre-site loading and testing
- Removes 100% of working under live load
- Lay flat idler and cable guide ensure that both the lay flat hose and electrical cables are fed evenly onto drum winches to prevent damage and maximise drum capacity
- “Feather touch” hydraulic adjustable hose and cable roller for easy operation
- Hydraulic hose tensioner for effective “down hole” retrieval
- On-board generator and fuel supply facilitates extended and isolated operation
- The winch guide prevents against stretching or twisting of the hose or electrical cables or over-tensioning
- Motion detector safety eye shuts down when operators are detected to be in work area
- Stability jacks secure the trailer and prevent tipping

Hydraulic isolation - stabilising jack control panel
