

PRIMEROYAL[®] SERIES

API 675 Metering Pump

DATA SHEET

Model PQ

The PRIMEROYAL[®] metering pumps are versatile, reliable pumps that consistently and accurately inject chemicals. The pumps' field-proven design enables precise control of the pump delivery rate with a $\pm 1\%$ steady state accuracy, over a range of 10 to 100% of the nominal flowrate. They feature a compact, variable eccentric drive that changes the stroke length by changing the position of the center of the shaft in the eccentric.

Model PQ provides accurate dosing of a broad spectrum of fluids used in many industrial processes thanks to its modular design which offers several types of liquid ends, capacity control options, and other configuration options enabling it to meet the specific requirements of your process application.

Simplex PRIMEROYAL[®] Pumps

PQ pump - Type H5 (HX) liquid end

	50 Hz motor	60 Hz motor
Flow rate	Up to 8,657 l/h	Up to 2,199 GPH
Pressure	Up to 1,035 bar	Up to 15,011 PSI
Thrust	3,500 daN	7,868 lbf
100% stroke	63 mm	2.48 in
Ambient T° Standard	-10 to +50 °C	+14 to +122 °F
Low T° design	-40 to +50 °C	-40 to +122 °F

Applications

- Oil & Gas:
 - Flow assurance on onshore and offshore sites: hydrate prevention by injection of thermodynamic inhibitors (methanol, MEG and glycol), prevention and removal of scale/asphaltene deposits, microbial pollution control by biocide injection, injection of corrosion inhibitors
 - Gas dehydration by MEG, TEG, DEG injection
 - Water treatment: closed drain pump for hydrocarbon condensate transfer
- Refinery/Petrochemistry/Chemistry:
 - Pumping of hydrocarbons/LP steam condensate
 - Transfer of ammonia water in fertilizer plant
 - Manufacturing of DME (dimethyl ether) from methanol
- General industry:
 - High pressure cleaning of mechanical parts for industry

- Compliant with API 675 standard
- Adaptability and accuracy: capacity adjustable while running or stopped (stroke micrometric adjustment, 10 turns only from 0 to 100%, graduation scale in %)
- Space constraints: available in vertical or horizontal motor configurations
- Suitable for the majority of fluids in all industrial processes: many stroke speeds for accurate dosing
- Modular design to precisely fit your needs: multiple options for liquid ends, check valves, connection types, and control.
- Multiplexing capability: providing cost savings in the power consumption and asset footprint while reducing pulsation and required NPSH and, giving the capability to inject several different products or meet a specific flow rate
- Long life: ensured by using high quality materials engineered to a robust and proven construction, oil bath lubrication for reliability during continuous operation
- Safety: diaphragm liquid ends guaranteed leak-proof design with service life in excess of 20,000 hours
- Operates even in the most extreme conditions : specific configurations to operate in saline/offshore conditions, desert, low temperature environments
- Global design: can comply with the main worldwide certifications and systems: ATEX, NACE, SASO, Customs Union, etc.
- Over-pressure protection: integrated safety valve to protect the pump on diaphragm liquid ends
- Easy and fast maintenance: the patented MARS system (Mechanically Actuated Refill System) on PTFE diaphragm liquid ends avoids the need to delicately adjust the refill valve

- Packed plunger, PTFE or metallic diaphragm liquid ends available
- Liquid end body in 316L S.S. or 17.4 PH. Other materials such as Alloy 20, Hastelloy, super Duplex available upon request
- Diaphragms in PTFE or 301 stainless steel. Plunger in ceramic (Al_2O_3) or chromium oxide coated
- 6 stroke speeds/gear ratios available with 50 Hz-motor: 48, 73, 93, 117, 146 and 175 spm. 5 stroke speeds/gear ratios with 60 Hz-motor: 58, 88, 112, 140 and 175 spm
- Manual, electrical or pneumatic stroke length adjustment
- IEC or NEMA mounting, motor for frequency variation
- Electric equipment for non-hazardous or hazardous area, large variety of protections and insulations
- Conforms to ATEX II 2 G Ex h IIC T4/T3 Gb X with ATEX motors
- Optimum protection for critical processes or pumped fluids: double diaphragm, diaphragm failure detection, temperature probes
- Special valves for any type of fluid (including concentrated sulphuric acid and slurries)
- Remote head, cooling/heating jacket to operate into processes requiring low/extreme fluid temperatures
- Full set of connections: screwed or flanged connectors (ANSI, DIN or ISO)
- Wide range of accessories available to complete your dosing installation

Design Specifications

According to your process, we advise you on the best design of liquid ends to meet your specific requirements. The following charts demonstrate the minimum and maximum flow rate and pressure of the pump for a single head on a basic configuration. To obtain the flow rate for multiplex head, multiply the flow rate by the number of heads. For other applications, please contact us.

Standard connections are depending on the plunger diameter; a full set of connections are available upon request. Please contact us for details.

Performances

Packed plunger liquid end

- High pressure capabilities
- Lowest NPSH requirements
- Ideal for viscous fluids and slurries
- Robust, Reliable and Efficient operation

LIQUID END TYPE P4 (NX)

- High and extreme pressure capability
- High hydraulic efficiency
- Contained leakage concept reduces monitoring and maintenance

Plunger diameter code	Swept volume	50 Hz Motor					60 Hz Motor					Connections
		Stroke speed max	Motor speed max	Flow rate max		Pressure max	Stroke speed max	Motor speed max	Flow rate max		Pressure max	
				10 bar	P.max				145 psi	P.max		
Ø	cm³	spm	rpm	l/h		bar	spm	rpm	gph		psi	
20	19.8	146	1440	166	100	1000	140	1728	42	25	14,503	3/4" - MP
25	30.9	146	1440	260	187	707	140	1728	66	48	10,254	3/4" - MP
28	38.8	146	1440	326	253	563	140	1728	83	64	8,165	3/4" - MP
32	50.7	146	1440	426	354	431	140	1728	108	90	6,251	1" - NPT

PTFE diaphragm liquid ends

- Widest chemical compatibility
- 100% leak-free
- High operational safety: integrated relief valve
- Improved lifecycle costs
- The MARS system offers a number of advantages over traditional refill systems in hydraulically actuated diaphragm liquid ends: easy start-up without the need to adjust the refill valve, a delicate procedure

LIQUID END TYPE H5 (HX) and H1-H4 (HPD)

- Universal solution
- Higher pressure capabilities
- High hydraulic efficiency

Metallic diaphragm liquid end

- Challenging products dosing: diffusing, radioactive liquids
- High pumped liquid temperatures
- High operation safety: integrated relief valve

TYPE M2 (MX)

- High and extreme pressures
- Low flow rates
