

PRIMEROYAL® Series

API 675 metering pump

Models PX

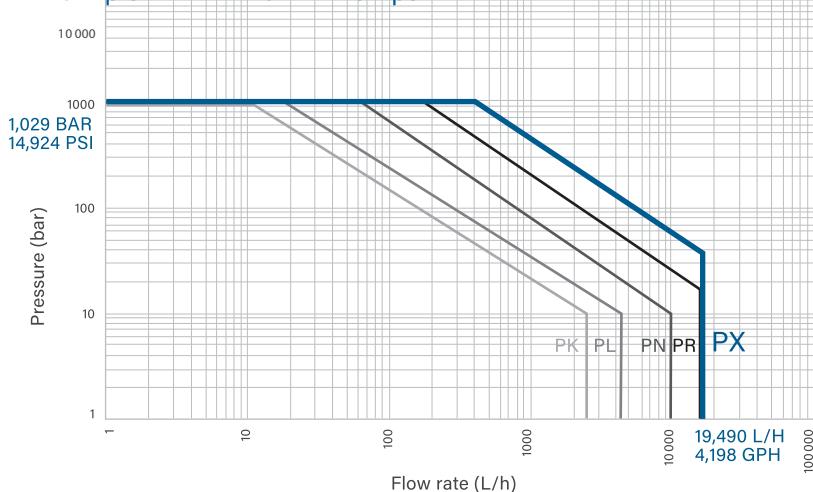

PRIMERO YAL® metering pumps are versatile, reliable pumps that consistently and accurately inject chemicals. The pumps' field-proven design enables precise control of the pump delivery rate with a +/-1% steady state accuracy, over a range to 10 to 100% of the nominal flow rate, and repeatability. They feature a compact, variable eccentric drive that changes the stroke length by changing the position of the center of the shaft in the eccentric. This API675-compliant pump has been designed to deliver maximum performance within a minimized footprint.

Model X provides accurate dosing of a broad spectrum of fluids at pressures up to 1,029 bar (14,924 psi) and a maximum flow rate of up to 16,490 l/h (4,198 GPH) per dosing head. Available in vertical or horizontal motor configurations and with ability to accommodate three types of liquid ends, PRIMERO YAL X can meet the specific performance requirements of numerous industrial applications.

PX pump

Simplex PRIMEROYAL® Pumps

	50 Hz motor	60 Hz motor
Flow rate	Up to 16,490 L/h	Up to 4,198 GPH
Pressure	Up to 1,029 bar	Up to 14,924 PSI
Thrust	6,000 daN	13,488
100% stroke	120 mm	4.72 in
Ambient T° Standard	-10 to + 50 °C	+ 14 to + 122 °F
Low T° design	-40 to +50 °C	- 40 to +122 °F

Applications

- **Oil and Gas:**
 - **Upstream:** injection of methanol, monoethylene glycol, corrosion inhibitors and many more to prevent hydrate formation, wax and scale deposits and corrosion in deep-water wells
 - **Midstream:** Injection of corrosion inhibitors for produced oil and gas integrity during transportation
 - **Downstream:** Injection of chemicals for separation and treatment of refined products
 - **Produced water treatment:** Injection of sodium hypochlorite, biocides, scale inhibitors, oxygen reducing agent, etc.
- **Chemical and Petrochemical Processing:** Dosing catalysts for polymerization of polyethylene
- **Power Generation:** High-pressure boiler feed water treatment
- **Refinery:** Pumping of hydrocarbons/condensate
- **Water Treatment in Oil & Gas:** Deep water disposal, hydrocarbon condensate transfer

Benefits

- Compliant with API675 standards
- Adaptability and accuracy: capacity adjustable while running or stopped (stroke micrometric adjustment, 10 turns only from 0 to 100%)
- Space constraints: Available in vertical or horizontal motor configurations
- Suitable for the majority of fluids and a large number of industrial processes: several stroke speeds for an accurate dosing
- Modular design to precisely fit your needs: more than five designs of liquid ends, specific check valves, adaptable connection types, control...
- Multiplexing capability: to reduce pulsations, meet a specific flow rate by reducing the number of parts, the power consumption and the footprint or to inject several products
- Long life: ensured by a robust and proven construction, oil bath lubrication to ensure reliability during continuous operation, best materials
- Safety: diaphragm liquid ends guaranteed leak-proof with service life in excess of 20,000 hours
- Operations even in the most extreme conditions: specific configurations to operate in saline/offshore conditions, desert, low temperature environment
- Global design: can comply with the main worldwide certifications and systems: ATEX, NACE, SASO, Customs Union, etc.
- Over-pressure protection: integrated safety valve to protect the pump on diaphragm liquid ends
- Maintenance easy and fast: the patented MARS system (Mechanically Actuated Refill System) avoid the need to delicately adjust the refill valve

Technical features

- Packed plunger, Teflon® PTFE or metallic diaphragm liquid ends available
- Liquid end body in 316L S.S., 17-4P-H, PVC or PVDF. Other materials like Alloy 20, Hastelloy, super Duplex available upon request
- Diaphragms in PTFE or 316L stainless steel; plunger in Z55CDV17 steel or chromium oxide coated
- 6 stroke speeds/gear ratios available with 50 Hz-motor: 39, 59, 100, 120, 144 and 180 spm. 5 stroke speeds/gear ratios with 60 Hz-motor: 47, 71, 120, 144 and 173 spm
- Manual or electrical stroke length adjustment
- IEC or NEMA mounting, motor for frequency variation
- Electric equipment for non-hazardous or hazardous area, large variety of protections and insulations
- Conforms to ATEX CE EX II 2G/D c T4/T3 with ATEX motors
- Optimum protection for critical processes or pumped fluids: double or triple diaphragm, diaphragm failure detection, temperature probes
- Food grade design (in accordance with CE 1935-2004)
- Special valves for any type of fluid (including concentrated sulfuric acid and slurries)
- Remote head, Cooling/heating jacket for handle processing requiring low/extreme fluid temperatures
- Full set of connections: screwed or flanged connectors (ANSI, DIN or ISO)
- Wide range of accessories available to complete your dosing installation

Design Specifications

According to your process, we advise you on the best design of liquid ends to meet your specific requirements. The following charts demonstrate the minimum and maximum flow rate and pressure of the pump for a single head on a basic configuration. To obtain the flow rate for multiplex head, multiply the flow rate by the number of heads. For other applications, please consult us.

Standard connections are depending on the plunger diameter; a full set of connections are available upon request. Please consult us for details.

Packed plunger liquid end

- High pressure capabilities
- Lowest NPSH requirements
- Ideal for viscous fluids and slurries
- Long term success, reliability, and efficiency

TYPE NX

- High and extreme pressure capability
- High hydraulic efficiency
- Contained leakage concept reduces monitoring and maintenance

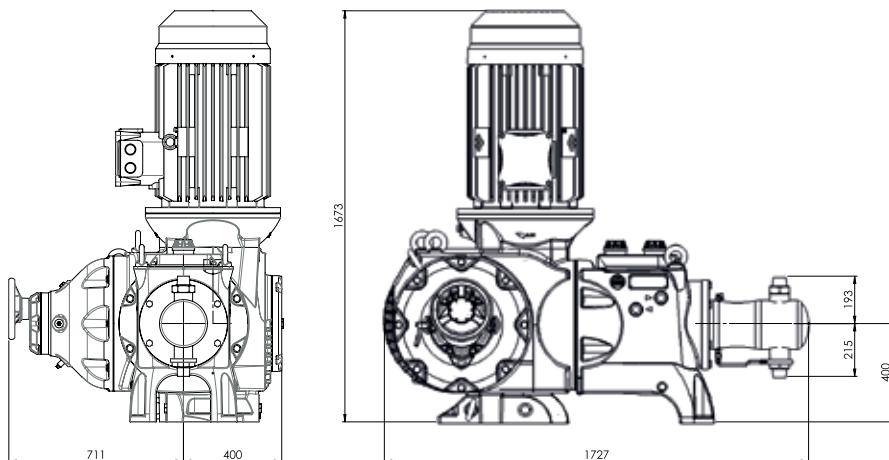

Plunger diameter code	Swept volume	50 Hz Motor					60 Hz Motor					Connections	
		Stroke speed max	Motor speed max	Flow rate max		Pressure max	Stroke speed max	Motor speed max	Flow rate max		Pressure max

Dimensions, Weight and Packing

The general dimensions are given as an indication only. The dimensions given correspond to the maximum dimensions (largest liquid ends, most powerful motor)

P4 (NX) LIQUID END

Simplex configuration

Version	Net weight(*)		Gross weight(*)		Packing	
	kg	lb	kg	lb	(L x W x H) mm	(L x W x H) in
Simplex - P4 (NX) liquid end	1270	2800	1600	3528	1950 x 1320 x 2100	76.7 x 52 x 82.7

(*) Approximately

PTFE diaphragm liquid ends

- Widest chemical compatibility
- 100% leakage-free
- High operational safety: integrated relief valve
- Cost effective solution in the entire product cycle life

TYPE H5 (HX)

- Universal solution

- The MARS system offers a number of advantages over traditional refill systems in hydraulically actuated diaphragm liquid ends: easy start-up without need to adjust the refill valve, a delicate procedure

- Higher pressure capabilities
- High hydraulic efficiency
